Claim 5 (original): The gaming device of Claim 1, which includes a plurality of paylines associated with the reels.

Claim 6 (previously presented): The gaming device of Claim 5, wherein the winning symbol combinations occur at a plurality of the symbol positions on the paylines.

Claim 7 (previously presented): The gaming device of Claim 1, wherein the winning symbol combinations are determined by at least one of: a random determination, a pre-determination and a determination based on a wager made by the player.

Claim 8 (original): The gaming device of Claim 1, wherein the symbols include at least one bonus symbol.

Claim 9 (previously presented): The gaming device of Claim 8, which includes at least one bonus award provided to the player when a winning symbol combination including said bonus symbol occurs on the reels.

Claim 10 (previously presented): The gaming device of Claim 9, wherein the bonus award is modified by at least one modifier.

Claim 11 (original): The gaming device of Claim 10, wherein the modifier includes a multiplier.

Claim 12 (currently amended): A gaming device comprising:
at least one display device;
at least one input device; and
at least one processor programmed to operate with the at least one display
device and the at least one input device to:

(a) provide a game including:

(i) a plurality of reels, each of said reels including a plurality of symbol
positions;

(ii) a plurality of symbols at the plurality of symbol positions on said
reels, said plurality of symbols including a plurality of first symbols,
wherein at least two of the first symbols are different and at least
one replicator symbol, wherein said at least one replicator symbol
includes at least two identical symbols at one of the plurality of a
single symbol positions on the reels wherein each of said identical
symbols of said at least one replicator symbol functions as an
individual symbol for evaluation purposes when determining
whether a symbol combination including said replicator symbol is
one of a plurality of winning symbol combinations;

(iii) at least one predetermined winning symbol combination of said a
plurality of winning symbol combinations including at least one of
said plurality of first symbols, wherein said predetermined winning
symbol combination occurs in a predetermined number of symbol
positions and is associated with an award adapted to be provided
to a player; and

(iv) at least one additional winning symbol combination of said plurality
of winning symbol combinations including the at least one replicator
symbol and at least one of said plurality of first symbols, wherein
said additional winning symbol combination is also associated with
said the same award as the predetermined winning symbol
combination and occurs in fewer symbol positions than said
predetermined number of symbol positions; and

(b) a processor programmed to for a play of the game:

- (a) activate the reels to generate one of the a plurality of the symbols at each of said plurality of symbol positions on said reels;
- (ii) determine both if said predetermined winning symbol combination and said additional winning symbol combination are generated on the reels, wherein for said determination, each of the same symbols of the at least one replicator symbol simultaneously functions as an individual symbol; and
- (b)iii) provide display said award to the player if:
 - (ia) said predetermined winning symbol combination is generated on the reels or
 - (iib) said additional winning symbol combination is generated on the reels.

Claim 13 (canceled).
